

# Depots

## Purpose

The Depots data-table a list of the locations where KKFU and KKL actually store cocoa which has been delivered by Zones who KKFU work with. It is an **master data-table** links to a number of other data-tables in the database.

It includes data-fields such as "ManagersID, to list the staff member of KKFU who runs the depot, and the "TransportAllowance" which gives the value in Cedi's of the budget the depot has for transportation.

A full listing of **all** the fields in the data-table with their purposes and any automation built into the App is laid out below. To fully understand the purpose of the data-fields please consult this.

All of the Depots KKFU work with are listed here.

## How and when to access Depots

The edit form is accessible from the KKSys System Entities screen, and is shown below.

A screenshot of a web-based data entry form titled "Data for: Juaben (Juaben) AS5-06-". The form has a toolbar with icons for save, undo, redo, and other functions. Below the toolbar, the form is labeled "Depots data" and "Depots: data ID: 4". The fields include: Name (Juaben), ReportingOrder (2), ManagersID (View Wiafe Nti Akenteng), RegionsID (View Juaben (Co-op)), CocoBodMark (AS5-06-), TargetBags (0), DateCreated (25/09/2009 13:56:49), Current (checked), and TransportAllowance (0).

Depots edit form

## Linkages to the Depots entity

From the Depots Entity it is possible to see lists of linked data, and add linked data. The image above shows the "New Items" menu open in the Societies Entity, with the linked data that can be added.

A screenshot of the same Depots edit form as above, but with the "New Items" menu open. The menu is located in the top right corner and contains four options: "1st Add new PrimaryEvacuations", "2nd Add new SecondaryEvacuations", "KK Add new Societies", and "Add new Phones". The options are numbered 1 and 2, and the "KK" icon is highlighted. The form fields are the same as in the previous screenshot.

## Linkages to the Depots entity

1. Depots can link to the entities shown: Societies, PrimaryEvacuations, SecondaryEvacuations and Phones.
2. The Depots entity is automatically linked to the Phones entity which is part of the Orixia framework, to allow storage of phone-numbers.

## Data-schema

Field- Name and Data-type	Description / Purpose	Possible Values	Coding / Automation
<b>ID</b> (Primary Key)	Unique number which identifies each record.		Automatically set by Orixia, not under the control of users or developers.
<b>Name</b> (Text)	Self explanatory	Entered by user	
<b>ReportingOrder</b> (Integer)	Self explanatory	Entered by user	
<b>ManagersID</b> (Link-ID)	Links to the Staff table	Selected from list by User	
<b>RegionsID</b> (Link-ID)	Links to the Regions table	Selected from list by User	Will default to the currently open Regions ID
<b>CocoBodMark</b> (Text)	Self explanatory	Entered by user	
<b>TargetBags</b> (Number)	Self explanatory	Any number value	Default value: 0
<b>DateCreated</b> (Timestamp)	Set to the exact date and time the record was first created.		Automatically set by Orixia, not under the control of users or developers.
<b>Current</b> (true/false)	Untick this field if the record is out-dated, no longer in use or discontinued.	True / false	Default value: true
<b>TransportAllowance</b> (Currency Value)	Self explanatory	Any number value	Default value: 0
