

# Full Documentation Index

The following is a full, indexed list of Orixia help documentation generated on: 24/09/2024.

Please remember that your Orixia system does not need to incorporate all, or even many of the features detailed here. Orixia is a well-developed, mature framework, but individual Apps will often focus on a single simple function. Features such as email, reporting, kanban-boards, charting and so on, may not be relevant for your needs. In that case these features would not be added to your App.

- [1. User Guide](#)
  - [1. What is the Orixia Framework?](#)
  - [2. General User-Interface Features](#)
    - [1. The System Entities Screen, general features](#)
    - [2. Customizing the System Entities Screen](#)
    - [3. The Main Menus](#)
    - [4. The Calender / Diary / Scheduler](#)
    - [5. Worksurfaces: Panels that show interlinked data in an intuitive way](#)
    - [6. View Grids for viewing, sorting and finding larger numbers of records](#)
    - [7. System Dataviewers: Panels that show data](#)
    - [8. The Communications Treeview](#)
    - [9. The Images Grid](#)
    - [10. Data Dashboards: Viewing data visually](#)
    - [11. The Data-cube: powerful data analysis](#)
    - [12. Charts: using the system to Visualize data](#)
    - [13. The Resources Treeview: Accessing Resources and Reports](#)
    - [14. The Report Preview Page](#)
    - [15. Kanban Boards: Panels that organise data by "Status"](#)
    - [16. Using Forecasts within an Orixia App](#)
    - [17. Synchronizing Data between users in a Multi-server Orixia App](#)
    - [18. The "Export Data" Window](#)
  - [3. Data Edit Forms: Viewing, Inserting and Editing Data in Business Objects](#)
    - [1. The main features of Edit Forms: customized controls to enable effective data-entry](#)
    - [2. The "People" and "Organisations" BusinessObjects](#)
    - [3. Built-in data-entities: Comments, FileNotes, Images, Addresses, EmailAddresses and Phones](#)
    - [4. The "Addresses" Edit Form](#)
    - [5. The "Comments" and "FileNotes" Edit Forms](#)
    - [6. The "Images" Edit Form](#)
    - [7. The "Phones" Edit Form](#)
    - [8. The "Email Addresses" Edit Form](#)
    - [9. The "Communications" Edit Form](#)

- [10. The "Types" Edit Form](#)
- [11. The "Status" Edit Form](#)
- [12. HTML Editor: User Interface to hold formatted text, images and tables](#)
- [13. The Orixia "Memo" window for editing and viewing long sections of text](#)
- [14. The Orixia Token Edit Control](#)
- [15. Spreadsheet Editor: User Interface to hold Excel-spreadsheet-like data](#)

## ■ [2. Administrator / Developer Guide](#)

- [1. Overview of Orixia System tables and Database Framework Standards](#)
- [2. Structuring Your Database - Orixia Standards and "How To" Guide](#)
  - [1. "Relational Data" how Orixia models data](#)
  - [2. What is a BusinessObject?](#)
  - [3. Creating a new BusinessObject for an Orixia System](#)
  - [4. Decorating your table column definitions to add functionality to an App](#)
  - [5. Reverse engineering a BusinessObject from an existing BusinessObject in another App](#)
  - [6. Some example BusinessObjects and explanations of parts of their scripts](#)
  - [7. The Purpose of the BusinessObjects Scripts and how to use them](#)
- [3. Underlying concepts of the Orixia Framework](#)
  - [1. What actually ends up on a Computer running an Orixia App?](#)
  - [2. Using the "Resources" system-table to create reports, charts, data-cubes and dashboards](#)
  - [3. System Tables: Types and Status](#)
  - [4. System Tables: Images](#)
  - [5. System Tables: Searches](#)
  - [6. System Tables: EditHistory](#)
  - [7. System Tables: Comments and FileNotes](#)
  - [9. Using the "ResourceName" field in Resources to chain resources together](#)
- [4. Specialized Orixia Tools and Apps used by the Developer](#)
  - [1. The System Menu](#)
  - [2. Customizing the User Interface "Layout Controls"](#)
  - [3. The Report Designer](#)
  - [4. Database Management Utility](#)
  - [5. Registry Management Utility](#)
  - [6. The SQL Scripting "Syntax Editor" and "SQL Modeller"](#)
  - [7. The System "Run Tests" window](#)

- [8. The System DB Modeller](#)
- [9. The CSV Importation \(and Export\) Utility](#)
- [10. Customizing or creating your own WorkSurfaces](#)
- [11. The Upgrader / Installer Utility Program](#)
- [5. Extending Your Orixia App](#)
  - [1. System Actions: Stored Procedures surfaced in the App](#)
  - [2. Adding a Kanban Board to your system](#)
  - [3. Adding a report, chart, cube or dashboard which can be run from the Calender / Scheduler](#)
  - [4. Running SQL scripts to change your App](#)
  - [5. The Link Items Toolbar](#)
  - [6. Dynamic Pascal-Scripting in Orixia: Adding a Resource to create Rapid-Entry-Grids in your App](#)
  - [7. Extending / Duplicating a Resource to create a new or different output](#)
- [6. Exporting Orixia data to an Excel Spreadsheet using ODBC](#)
- [7. Importing Data into Your App from Excel, XML or CSV files](#)
- [8. Disaster Recovery database restoration and other procedures](#)
- [9. Using and adding to the Orixia Help System](#)
  - [1. Structural guide-lines: How to lay out Help Pages, and editor short-cut keys](#)
- [10. Customizing the user interface](#)
- [11. Reallocation of Child Data: Moving child records to link to a new master record](#)
- [12. Explaining the "Problem Logging changes in EditHistory" error message](#)

- [3. SQL Language Guide](#)
  - [1. Background to Structured Query Language](#)
  - [2. Components of the SQL SELECT Statement](#)
  - [3. SQL SELECT extensions in Orixia](#)
  - [4. Useful websites for SQL language training or reference](#)
  - [5. SQL DDL Syntax Guide](#)
    - [1. CREATE STORE, DROP STORE, ALTER STORE](#)
    - [2. CREATE JOB, ALTER JOB, DROP JOB](#)
    - [3. CREATE FUNCTION, CREATE PROCEDURE](#)
  - [6. Basics of SQL Functions and Procedures](#)
  - [7. Configuration Tables in the database and the Database Catalog](#)

- [4. Programmer Guide: Technical Details of Orixia](#)
  - [1. The Orixia Server Program](#)

- [2. Creating a new App from scratch in the Orix DB Utility](#)
- [3. Third party components used](#)
- [4. Making Changes to your App Running Change Scripts](#)
- [5. Restoring a database from a backup file in the Orix Server Program](#)
- [6. Where Orix Saves Configuration Settings for different parts of an Application](#)

## ■ [5. Miscellaneous documents and FAQs](#)

- [1. Adding Phone Numbers and Email Addresses](#)
- [2. Orix Automated Email Systems](#)
- [3. System Reporting "XML" template conversions and "FR3" files](#)
- [4. Using Windows "Quick Assist" to allow assistance by Orix staff for installations](#)
- [5. Data backup with Orix from quick-and-dirty to automated off-site backup Jobs](#)
- [6. How Data-Field Computation and Generation works in Orix](#)
- [7. Trainings System for Managing Staff Training](#)
- [8. Using the Description field of a Types record to Generate a value](#)
- [9. Orix View-Grid Search features](#)
- [11. Tasks Management Business Object](#)

## ■ [6. System Specific Help](#)

### ■ [1. SerendiSys Items](#)

- [1. Assets and Maintenance](#)
- [2. Loans and LoanPayments](#)
- [3. FarmFields and FieldCrops: Mechanisms to store details of Crops per farmer and per field](#)
- [4. How the "Wages" Computation systems work](#)
- [5. Extensions to the SocialIndicators system](#)
- [6. Adding Professional Staff Wages](#)
- [7. Tax, PAYE and SSNIT Computation in SerendiSys](#)
- [8. Code for production of a Farmer List with Crop Hectares](#)
- [9. SMS System Window: Bulk-send SMS Messages](#)
- [10. QuickBooks data export - import process](#)

### ■ [3. Fullwell Mill "FMSys" Help](#)

- [1. Product "StatusID" programming](#)
- [2. Using "ProductPrices" to monitor and update prices](#)
- [3. Deleted Records Change-tracker](#)
- [4. Issues with Adding Comments](#)

### ■ [4. Orix Billing System](#)

- [1. Data model for the Contract Process and details of the WorkItems BusinessObject](#)

- [5. Equal Exchange EESys](#)

- [1. Bougheys CSV Export Process](#)
- [2. EESys Continuous Improvement System](#)
- [3. Setting up Email in Orix](#)
- [4. EESys Stock Movements System](#)
- [5. Cloning old data from FMSys into EESys](#)
- [6. EESys Internet Order Confirmation](#)
- [7. EESys: Use of the Sales Invoices "Dispatched Quantity" Grid](#)
- [8. Assigning Stock to an Invoice](#)
- [9. How prices and discounts are set in the SalesInvoices system for EESys](#)
- [10. Allergen Risks in EESys](#)
- [11. Importing Web-shop orders into EESys](#)
- [12. Daily Activity Worksurface](#)
- [13. Automated Email Settings for EESys](#)
- [14. Products Change-tracker](#)
- [15. How to Clone Products From FMSys into the EESys database](#)

- [6. Fruits of the Nile FONSys](#)

- [1. Main Elements of FONSys "System Entities" screen](#)
- [2. Adding and editing Farmer data](#)
- [3. Viewing Farmer-lists and editing the data](#)
- [4. The Inspections, Non-Conformities and Farm-Fields Entities](#)
- [5. Stepping through the FON Business Process from Purchases to Shipping](#)
- [6. FONSys: Continuous Improvement System \(CIS\)](#)

- [7. Kuapa Kokoo KKSys: Help Files](#)

- [1. KKSys Database Definition Documentation](#)

- [1. Society related database elements](#)
  - [1. Societies and Zones](#)
  - [2. District Elections](#)
  - [3. Society Elections](#)
  - [4. Society Evaluations](#)
  - [5. Society Activities](#)
  - [6. Projects](#)
- [2. Farmer related database elements](#)
  - [1. People](#)
  - [2. Farmers](#)
  - [3. Membership Details](#)
  - [4. Inspections](#)
  - [5. Farmer Deliveries](#)
  - [6. Farm Fields](#)

- [7. Co-op Transactions](#)
  - [8. Caretakers](#)
  - [9. Election Candidates](#)
  - [10. Calls](#)
- [3. Questionnaire related database elements](#)
  - [1. Questionnaires](#)
  - [2. Question Sections](#)
  - [3. Questions](#)
  - [4. Answers](#)
  - [5. Non-Conformities](#)
- [4. KKFU related database elements](#)
  - [1. Staff](#)
  - [2. Depots](#)
- [5. The cloud API, its standards and operation](#)
- [2. The KKFU ICO System](#)
  - [1. The Inspection/Questionnaires data-entry system](#)
  - [2. Creating a new Questionnaire](#)
  - [3. Issues with ICO System installation and procedures for fixing problems](#)
- [3. KKSys Rapid Entry Grids and Forms](#)
  - [1. Societies Membership Update Form](#)
  - [2. Farmer Deliveries Rapid Entry Grid](#)
  - [3. New Members Form](#)
  - [4. Membership Updates Dashboard](#)
  - [5. Mapping Systems in KKSys](#)
- [4. TeleAgric Dashboard](#)
- [5. KKFU System Installation and database management](#)
  - [1. Installing the ICO System](#)
  - [2. KKSys Laptop Installation](#)
  - [3. KKSys Database Access: Frequent Issues Check-sheet](#)
  - [4. Managing AGIS Inspection Data Importation](#)
  - [5. Working with the "Import AGIS Data" and "Import Mapping" Screens](#)
  - [6. Save Local Updates Procedure](#)
  - [7. Incorporating data from the 2023 KKFU database into the 2024 version](#)
- [6. Farmer Delivery Phone Application](#)

- [7. Higher Level Developer Guide](#)

- [1. How the Orixas Subscription System works](#)
- [2. Problem solving: Clearing / Removing Temporary Files created by the database](#)
- [3. Programatic Manipulation of Excel Spreadsheets prior to Orixas Importation](#)
- [4. How to add Pascal Scripts in your App](#)
- [4. Writing Pascal Scripts](#)
  - [1. Pascal-Script language elements](#)
  - [2. Pascal-Script functions and procedures](#)
  - [3. More advanced Pascal Scripting](#)
- [5. Adding "PDFRunner" and "EmailRunner" Dynamic Link Libraries to automate PDFs and email in your Orixas App](#)
- [7. Orixas Registry Settings](#)
- [8. Batch insertion of multiple rows of data in a child table](#)
- [9. Using "DebugView" to review event calls in Orixas Apps and track down difficult bugs](#)
- [10. Exploring the "EditHistory" user-activity audit table](#)
- [11. Altering Custom look-up lists in Edit Forms](#)
- [12. The UIDGenerator table Framework table](#)
- [13. Issues with Replication and Update Files in Orixas](#)
- [14. Solving the "Cannot lock Table XXX" Error message](#)

- [8. Delphi IDE Help Documentation](#)

- [1. Settings up GIT and opening EMB sample projects](#)
- [9. Recently added and updates Orixas Features and Help Pages](#)
- [12. Contact Orixas](#)
